这两个变量值代表下面哪个框

```
String sm3step = request.getParameter("step");
String sm3step_final = request.getParameter("step_final");//
```

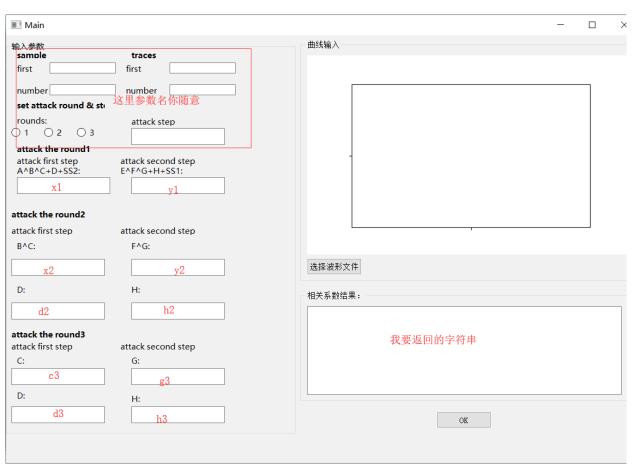

哪里需要上传data trace文件

我运行不出来是因为这里有问题吗？

```
        'step_final': str(data[16]),
        }
r = requests.get('http://192.168.1.109:8080/sm3_test/servlet/send_test', params=payload)
r.encoding = 'utf-8'
content = r.text
print(content)
return content
```

http://192.168.1.109:8080/sm3_test/servlet/send_test

读这两个文件的作用

```
//a.select(t);
//Test1 RT=new Test1();
ReadTxt RT=new ReadTxt();
ReadCSV RV=new ReadCSV();
try {
       arr_trace=RV.initTrace();//返回一个数组
        //arr_data=RT.initdata();
       arr_data=RT.initarr();//返回字节
```

这些值是哪个部分的结果

相关系数结果:

Best correlation:
0, Key candidate: 23979 (0x5DAB), value: 0.7910
1, Key candidate: 21931 (0x55AB), value: 0.7111
